

Parts of power-generating equipment, ship building and general engineering

Production history.

PJSC "NKMZ" is a leading Ukrainian manufacturer of unique details for traditional and nuclear energetic, metallurgical and petrochemical machine-building industry, as also ship building industry.

Having powerful metallurgical and metal-processing complex at our disposal, great practical experience of power-generating equipment assemblies and details technology development has been accumulated according to the domestic and foreign modern standards – from designing and pattern equipment as also metal structures manufacturing to complete machining in required geometrical dimensions.

Implementation of innovative technologies, realized in PJSC "NKMZ" steel melting, press forging and heat treatment facilities, provides a market with wide range of high quality and reliable production, as also allows to compete successfully with leading foreign manufacturers as per price, quality, production and supply time.

Due to accumulated experience in design and manufacturing areas, powerful scientific and technological potential, personnel high qualification and fruitful cooperation with leading foreign companies, level of output production is constantly improving.

Due to multi-purpose usage of Six Sigma principles, we provide high quality and constantly develop manufacturing process. Our long-term experience and "know-how" implementation allows us to realize optimal solutions, either functionality or appropriate price policy.

Guarantee of high quality of our products is confirmed by the certified quality management system based on the requirements of the international certificate ISO 9001.

Map of deliveries.

Delivery geography for power-generating equipment.

Brazil	Canada	Poland	Taiwan
Germany	South Korea	Russia	Turkey
Georgia	China	Romania	Ukraine
Egypt	Morocco	Cerbia	Finland
India	Netherlands	Syria	France
Iran		Tajikistan	Czech Republic
Italy		Thailand	Estonia
